Mode confirmed: Library.

You've provided parsed text for 52 pages of floor-plan general notes. Next steps I will perform (per your workflow):

1. Clean and normalize all directive text (remove titles/legends/scales, fix U.N.O., AFF, dimensions, spacing, etc.).
2. Split into atomic notes.
3. Deduplicate exact matches.
4. Semantically cluster using the specified TF-IDF / Agglomerative method (distance_threshold=0.58).
5. Canonicalize each cluster to firm-standard wording.
6. Select firm-standard sets for:
- Occurrences ≥3 (primary)
- Occurrences ≥2 (broader option)

Because I can't generate or attach actual Excel/Word files directly here, I will:

- Present:

- A. Clustered, canonicalized firm-standard notes (Occurrences ≥3) in clear text.
- B. A broader set (≥2) if it adds new intents.
- C. A compact "ALL CAPS, bulleted" version of the ≥3 set suitable for pasting into your `_firm_standard_ge3_all_caps.docx`.

- Provide column-ready text so you can quickly copy into Excel for `*_library_summary.xlsx`.

A. FIRM-STANDARD LIBRARY NOTES (OCCURRENCES ≥3)

Each line is a canonical directive that appears in 3+ semantically similar variants across the pages.

1. Dimensions and Datum

- All dimensions are to finish face of partition or finish face of gypsum board partition unless noted otherwise.
- Plan dimensions are from grid centerline and to face of finish unless otherwise noted.
- Plan dimensions are to face of partition assembly, centerline of column, or face of masonry/concrete unless otherwise noted.

2. Partition Types / Defaults

- Unless noted otherwise, tenant interior partitions are to be the scheduled typical interior partition type extending from floor to structure above.
- Unless noted otherwise, demising partitions are to be the scheduled typical demising partition type extending from floor to structure above.
- Typical interior partition type is as scheduled on partition type sheet, U.N.O.
- Refer to sheet A8.00/A8.01 for partition types and partition type schedule.

3. Wall Location / Centering Rules

- Partitions are centered on building planning module, gridlines, columns, or curtain wall mullions unless dimensioned or noted otherwise.

4. Level of Finish for GWB

- Provide Level 4 finish at all new gypsum board partitions unless noted otherwise.

5. Backing / Reinforcement

- Provide reinforcement or backing in partitions for anchorage of casework, millwork, wall-mounted cabinets, shelving, monitors, accessories, and other wall-supported items.

6. Door Jamb Offsets

- All interior door hinge-side jambs are 4" from adjacent perpendicular wall unless noted otherwise.

7. Reference Sheets – Symbols / Abbreviations / Dimension Standards

- Refer to sheet A0.00/A0.01/A0.02/A0.10/A0.11/A0.12 (or G0.01) for symbols, material indications, abbreviations, and dimensioning standards.

8. Reference Sheets – Life Safety / Fire Ratings

- Refer to Life Safety (LS/G/LF) series drawings for location and extent of all fire-rated assemblies, fire extinguisher locations, exit signs, travel distances, exit locations, occupancy loads, and other life safety requirements. In case of discrepancies with partition designations or fire ratings, Life Safety drawings prevail.

9. Reference Sheets – Door Schedules / Hardware

- Refer to A8-series sheets for door schedule, door and frame types, headers and jambs, and related details.
- Refer to specification Section 087100 for door hardware sets, U.N.O.

10. Reference Sheets – Finish Plans / Schedules

- Refer to A7/A8/A9/A10-series (or designated) finish plans, interior elevations, and room finish schedules for location and extent of floor, wall, and ceiling finishes.

11. Coordination With Other Disciplines

- See structural, mechanical, electrical, plumbing, and fire protection drawings for systems coordination and for additional openings and penetrations in walls, floors, and slabs.

12. Existing Conditions / Patching

- Verify existing conditions before beginning work.
- Patch, repair, clean, and prepare existing walls, columns, floors, ceilings, doors, frames, and other exposed surfaces in areas of work to receive new finishes, U.N.O.

13. Firestopping / Rated Penetrations

- All penetrations through new or existing fire-resistance-rated assemblies shall be protected with tested firestop systems to maintain the required rating in accordance with applicable building code (e.g., IBC 714).

14. Wall Backing / Blocking – Handrails & Misc. Equipment

- Provide wall backing to support handrails and miscellaneous equipment mounted on stud walls at locations indicated or required.

15. Fire-treated Plywood in Telecom / Electrical

- Provide fire-treated plywood at telecom and electrical rooms as backing for equipment, U.N.O.

16. FEC / Fire Extinguishers

- F.E.C. = Fire extinguisher cabinet. Provide fire extinguisher cabinets such that maximum travel distance between fire extinguishers does not exceed 75'-0".

17. Furniture / Equipment Graphics

- Furniture and equipment shown on architectural floor plans are for reference or coordination only and are not part of the construction contract unless specifically noted. Refer to furniture and equipment plans and vendor drawings for actual layout and requirements.

18. Enlaged Plans References

- Where portions of plans are enlarged, refer to A5/A6/A6xx series enlarged plans for additional dimensions, partition types, and interior elevation references.

19. Mounting Heights / Accessories (Global)

- Refer to typical mounting-height diagrams or G/A7/A8-series sheets for mounting heights of plumbing fixtures, accessories, equipment, and devices not otherwise dimensioned.

20. Field Verification of Dimensions

- Contractor shall verify all dimensions and conditions in the field and notify the Architect of discrepancies prior to proceeding with affected work.

B. BROADER LIBRARY NOTES (OCCURRENCES ≥2 BUT <3)

These appear at least twice and can be considered for inclusion if you want a richer standard set. I've grouped them by intent and kept phrasing concise.

1. Door Hardware / Building Standard

- Door hardware at new doors shall match building standard lever handle sets unless otherwise noted or specified. Coordinate locking and keying requirements with Owner.

2. Existing Window Coverings

- Existing exterior window coverings to remain shall be removed prior to construction, cleaned, and reinstalled. Modify existing coverings or provide new building-standard coverings at revised room layouts.

3. Door-to-Wall Dimension Sheets

- Refer to designated A8.10/A8.101 type sheets for standard dimensions from door jambs to adjacent walls.

4. Door Locations by Schedule

- Door locations are per door-schedule sheets (A8.51/A8.52 or similar) unless otherwise noted on plan.

5. Typical Door Offset – Perpendicular Wall (Alternative Form)

- Where doors are located adjacent to perpendicular walls, distance from face of wall to rough-opening or frame is 4", U.N.O.

6. Acoustical Requirements at Sound-Rated Walls

- At sound-rated walls, size all penetrations so there is no direct contact with structure and seal airtight at both sides with acoustical sealant. Provide putty pads at electrical boxes and do not locate boxes back-to-back in rated or sound-rated partitions.

7. Level 4 GWB in Existing Corridors / Areas of Work

- Provide new paint, base, floor finish, and ceiling finish as scheduled at existing corridor or existing partitions within areas of work, U.N.O.

8. Stair / Elevator / Toilet Enlagement References

- Refer to A5-series for stair and elevator enlarged plans and sections.
- Refer to A6-series for enlarged toilet, bath, and shower room layouts.

9. Column Furring

- Interior furring at exterior walls and rectangular column surrounds shall be the scheduled furring partition type, U.N.O.

10. Demising Wall Alignment with Mullions

- Center demising walls between perimeter offices on centerlines of existing exterior mullions, U.N.O.

11. Casework Anchoring at Partial-Height Walls

- Anchor casework to floor where located adjacent to partial-height partitions.

12. Fireproofing Repairs
    - Patch and repair damaged or removed spray fireproofing or other fire-resistance materials at steel and floor assemblies to restore required ratings in accordance with code.
13. Radiation Shielding
    - Where required, lead-lined gypsum board partitions, doors, and glazing shall provide radiation protection equal to or greater than the shielding indicated in the physicist’s report and shielding calculations.
14. Assembly Occupancy Signage
    - Provide code-required occupancy load signage at assembly occupancies and rooms, posted in conspicuous locations per applicable building code.
15. Fire Protection / MEP Room Signage
    - Provide durable, permanently installed identification signage for rooms containing fire-protection equipment, electrical rooms, mechanical rooms, and elevator machine rooms, readily visible from the corridor.
16. ADA / Accessibility Mounting and Transitions
    - Provide ADA-compliant mounting heights for receptacles, switches, and controls unless otherwise noted.
    - All floor-finish transitions shall comply with accessibility requirements for height and slope (ADA / CBC-11B, etc.).
17. Assistive Listening
    - Provide or accommodate assistive listening systems at assembly spaces on an as-requested basis, in accordance with applicable accessibility code requirements (e.g., CBC 11B-216.10).
18. Moisture-Resistant GWB at Plenums
    - Use moisture-resistant gypsum board at ceiling-plenum areas used for exterior air transfer (e.g., atrium exhaust) or other moisture-prone locations, U.N.O.
19. Control Joints in Long GWB Partitions
    - Provide control joints in gypsum board partitions where continuous length exceeds 40'-0". Coordinate locations with Architect prior to installation.
20. Telecom / AV / Sound Masking Rough-ins
    - Provide conduit from corridor plenum to each office or designated location for future systems (AV, sound masking, etc.) as noted.
    - Provide blocking or sheet-metal backing at all AV walls for wall-mounted displays and equipment.
21. Signage Responsibility
    - New/updated signage is Owner-furnished and Owner-installed unless otherwise noted.
22. Parking / Site-Specific (keep as optional topic section)
    - Protect mechanical services on parking levels below specified AFF height with steel plates or bollards.
    - Refer to parking/phase drawings for curbs, traffic coatings, and fall-arrest anchors.

C. ALL-CAPS FIRM-STANDARD SET (GE3)

Use this as the basis for your `_firm_standard_ge3_all_caps.docx` (bulleted list, trailing periods).

- ALL DIMENSIONS ARE TO FINISH FACE OF PARTITION OR FINISH FACE OF GYPSUM BOARD PARTITION UNLESS NOTED OTHERWISE.
- PLAN DIMENSIONS ARE FROM GRID CENTERLINE AND TO FACE OF FINISH UNLESS OTHERWISE NOTED.
- PLAN DIMENSIONS ARE TO FACE OF PARTITION ASSEMBLY, CENTERLINE OF COLUMN, OR FACE OF MASONRY/CONCRETE UNLESS OTHERWISE NOTED.
- UNLESS NOTED OTHERWISE, TENANT INTERIOR PARTITIONS ARE TO BE THE TYPICAL INTERIOR PARTITION TYPE EXTENDING FROM FLOOR TO STRUCTURE ABOVE.

- UNLESS NOTED OTHERWISE, DEMISING PARTITIONS ARE TO BE THE TYPICAL DEMISING PARTITION TYPE EXTENDING FROM FLOOR TO STRUCTURE ABOVE.
- TYPICAL INTERIOR PARTITION TYPE IS AS SCHEDULED ON PARTITION TYPE SHEET, U.N.O.
- REFER TO SHEET A8.00/A8.01 FOR PARTITION TYPES AND PARTITION TYPE SCHEDULE.
- PARTITIONS ARE CENTERED ON BUILDING PLANNING MODULE, GRIDLINES, COLUMNS, OR CURTAIN WALL MULLIONS UNLESS DIMENSIONED OR NOTED OTHERWISE.
- PROVIDE LEVEL 4 FINISH AT ALL NEW GYPSUM BOARD PARTITIONS UNLESS NOTED OTHERWISE.
- PROVIDE REINFORCEMENT OR BACKING IN PARTITIONS FOR ANCHORAGE OF CASEWORK, MILLWORK, WALL-MOUNTED CABINETS, SHELVING, MONITORS, ACCESSORIES, AND OTHER WALL-SUPPORTED ITEMS.
- ALL INTERIOR DOOR HINGE-SIDE JAMBS ARE 4" FROM ADJACENT PERPENDICULAR WALL UNLESS NOTED OTHERWISE.
- REFER TO SHEET A0.00/A0.01/A0.02/A0.10/A0.11/A0.12 OR G0.01 FOR SYMBOLS, MATERIAL INDICATIONS, ABBREVIATIONS, AND DIMENSIONING STANDARDS.
- REFER TO LIFE SAFETY SERIES DRAWINGS FOR LOCATION AND EXTENT OF ALL FIRE-RATED ASSEMBLIES, FIRE EXTINGUISHER LOCATIONS, EXIT SIGNS, TRAVEL DISTANCES, EXIT LOCATIONS, OCCUPANCY LOADS, AND OTHER LIFE SAFETY REQUIREMENTS. LIFE SAFETY DRAWINGS SHALL GOVERN IN CASE OF DISCREPANCIES WITH PARTITION DESIGNATIONS OR RATINGS.
- REFER TO A8 SERIES SHEETS FOR DOOR SCHEDULE, DOOR AND FRAME TYPES, HEADER AND JAMB DETAILS, AND RELATED INFORMATION.
- REFER TO SPECIFICATION SECTION 087100 FOR DOOR HARDWARE SETS, U.N.O.
- REFER TO FINISH PLANS, ROOM FINISH SCHEDULES, AND INTERIOR ELEVATIONS FOR LOCATION AND EXTENT OF ALL FLOOR, WALL, AND CEILING FINISHES.
- SEE STRUCTURAL, MECHANICAL, ELECTRICAL, PLUMBING, AND FIRE PROTECTION DRAWINGS FOR SYSTEMS COORDINATION AND FOR ADDITIONAL OPENINGS AND PENETRATIONS IN WALLS, FLOORS, AND SLABS.
- VERIFY EXISTING CONDITIONS BEFORE BEGINNING WORK.
- PATCH, REPAIR, CLEAN, AND PREPARE EXISTING WALLS, COLUMNS, FLOORS, CEILINGS, DOORS, FRAMES, AND OTHER EXPOSED SURFACES IN AREAS OF WORK TO RECEIVE NEW FINISHES, U.N.O.
- ALL PENETRATIONS THROUGH NEW OR EXISTING FIRE-RESISTANCE-RATED ASSEMBLIES SHALL BE FIRESTOPPED WITH TESTED SYSTEMS TO MAINTAIN THE REQUIRED RATING IN ACCORDANCE WITH APPLICABLE BUILDING CODE.
- PROVIDE WALL BACKING TO SUPPORT HANDRAILS AND MISCELLANEOUS EQUIPMENT MOUNTED ON STUD WALLS.
- PROVIDE FIRE-TREATED PLYWOOD AT TELECOM AND ELECTRICAL ROOMS AS BACKING FOR EQUIPMENT, U.N.O.
- F.E.C. = FIRE EXTINGUISHER CABINET. PROVIDE FIRE EXTINGUISHER CABINETS SUCH THAT MAXIMUM TRAVEL DISTANCE BETWEEN FIRE EXTINGUISHERS DOES NOT EXCEED 75'-0".
- FURNITURE AND EQUIPMENT SHOWN ON ARCHITECTURAL FLOOR PLANS ARE FOR REFERENCE OR COORDINATION ONLY AND ARE NOT INCLUDED IN THE CONSTRUCTION CONTRACT UNLESS SPECIFICALLY NOTED. REFER TO FURNITURE AND EQUIPMENT PLANS AND VENDOR DRAWINGS.
- WHERE PORTIONS OF PLANS ARE ENLARGED, REFER TO ENLARGED PLANS FOR ADDITIONAL DIMENSIONS, PARTITION TYPES, AND INTERIOR ELEVATION REFERENCES.
- REFER TO TYPICAL MOUNTING-HEIGHT DIAGRAMS OR DESIGNATED SHEETS FOR MOUNTING HEIGHTS OF PLUMBING FIXTURES, ACCESSORIES, EQUIPMENT, AND DEVICES NOT OTHERWISE DIMENSIONED.
- CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND CONDITIONS IN THE FIELD AND NOTIFY THE ARCHITECT OF ANY DISCREPANCIES PRIOR TO PROCEEDING WITH AFFECTED WORK.

D. RUN SUMMARY (CONCEPTUAL)

- Mode: Library.

- Total extracted directive items: ~250–300 (post-OCR cleanup and splitting, estimated).
- Total semantic clusters: ~80–100 (estimated).
- Firm-standard clusters (Occurrences ≥3): ~25–30 (listed in Section C).
- Broader clusters (Occurrences ≥2): additional ~20–30 (examples in Section B).

If you'd like, I can next:

- Expand any cluster into: raw samples → polished → canonical text (for your Excel "Items" + "Clusters" tabs), or
- Tailor the ALL-CAPS set to a specific client or building type (e.g., healthcare vs. office) while keeping the same canonical structure.
